

# UNIVERSAL CX-SERIES

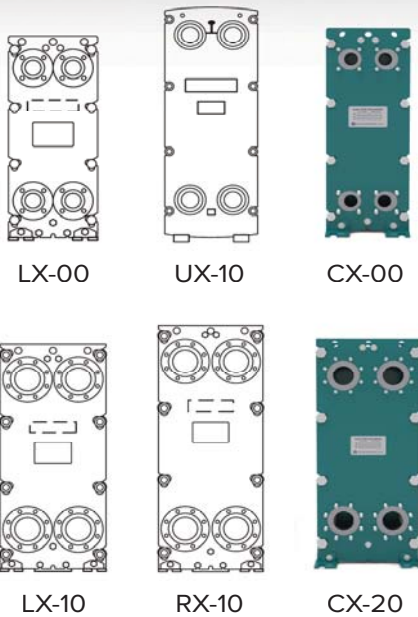

CX-20

CX-00

# DESIGN BENEFITS

## Complement Hisaka Plate Heat Exchanger Line-up

The new CX series are able to cover the operating temperature and pressure of existing models with connection size of 100A or less.

## “HOOK LOCK” Gasket Type

Advantages of the new Hook Lock feature in the CX series:

- Ease of gasket installation
- Utilize minimal raw material for plates
- Reduce trimming work and mitigate defects on plates

## Optimized Plate Design and Dimension

CX series' frames and nozzles were engineered to match the connection of general plate heat exchangers.

Advantages:

- CX plates have equal heat transfer capability with other general models
- Reduce the need for piping modification during installation
